

On the Subject of Wolf, Goat, and Cabbage.

Do you remember the old riddle Wolf, Goat, and Cabbage from Alcuin of York? If not, you now have a chance to solve it! Well, if only this is not attached to the explosive device.

- Pictures of 6 to 9 creatures will be shown on the middle screen one at a time.
- Buttons to the left and right of this screen can be used to cycle for each creature.
- Button labeled aboard will move the current creature on the screen to the virtual boat or leave the boat when pressed.
- Button labeled row will move you and everything on the boat to the opposite side of the virtual river when pressed.
- Keep track of the current side of each creature and yourself as this will not be shown on the module.
- The red button will reset the module when pressed but will not regenerate the module.
- The light will be on when the current creature is on the boat and off otherwise.
- Each creature has conflicts with another and must not be left together unsupervised. These conflicts are listed on the second page of the manual.
- The boat will have **exactly** the minimum spaces required to prevent such conflict to occur.
- The module will strike if one of the following occurs:
 - Trying to move a creature on to the boat when the boat is full.
 - Trying to move a creature on to the boat when it is on the opposite shore from the boat.
 - Trying to row while there are conflicts among creatures on land.
- Moving every creature across the river will solve the module.

Conflicts List

Why are you expecting this to be accurate?

- Underneath each creature's name are creatures that have conflict with it.
- Use this information to determine a collective group that can be left together on the land.

Cat

- Fish
- Mouse
- Goose
- Bear
- Wolf

Wolf

- Fox
